

INSTRUCTIONS FOR ORGANIZATION AND CONDUCT OF PRACTICAL TRAINING IN THE CONDITIONS OF TEMPORARY RESTRICTIONS OF THE EDUCATIONAL PROCESS ORGANISATION IN DONETSK NATIONAL MEDICAL UNIVERSITY

1. In accordance with the "Regulations on distance learning at Donetsk National Medical University" approved on 03.11.2020, protocol №4, practical training in distance learning format at Donetsk National Medical University (hereinafter - the University) is carried out by using an educational platform for distance learning based on G Suite for Education from Google (hereinafter - the Platform) and other software products and online services.

2. Technical and information-technological support, organization and support of the Platform at the University is carried out by the department of distance learning with the support of the information-telecommunication department, the department of quality control of education and the educational department.

3. Direct educational and methodical guidance of students' practice is provided by responsible departments, which:

- develop a work program of practice and, if necessary, refine it;
- lecturers of the departments entrusted with the practice management, develop an action plan for adapted modeling of the trainee's working place and systematic advice to students on all practice tasks, provide students reporting via electronic means of communication. Google class is created for each academic group;
- according to the work programs, work curricula and methodical instructions on practical training determine the duration of practice in each discipline, practice goals and objectives, the content of practice, its heads (from each component), a list of skills required for students' assimilation, requirements for practice report, summarizing the practice.

4. Due to temporary restrictions on the organization of the educational process and impossibility of students' contact with patients at specialized departments involved in practical training, each student is provided with:

- Methodical instructions of practical training, the list of skills for studying and mastering (on each practice sections);
- The peculiarities of the design of the practice training diary on the subject depending on the program of practice are explained, which should include:
 - description of the virtual patient (taking into account the basic nosological units of the subject), namely;
 - physical examination data;
 - plan of laboratory and instrumental research;

- preliminary diagnosis, the results of the differential diagnosis with the subsequent formation of the clinical diagnosis;
- plan of treatment and prevention measures;
- providing emergency care for emergencies (the list of states is formed by the specialized department in accordance with the work program of the discipline).

References are provided to the sources of educational literature of the department (main, supplementary), methodical instructions on the subject, algorithms for performing practical skills (preferably with video content - YouTube, own educational video), made for processing during the practical training, lectures, educational films, etc.

After mastering the practice training program by the student, the head of practice (on a separate subject) assesses:

- a. Practice diary (possibly in electronic form);
- b. The quality of learning practical skills - the correctness and sequence of actions in the performance of skills in solving the situational task of a simulated patient (SP);
- c. Correctness of diagnosis and differential diagnosis, examination and treatment plans and preventive measures;
- d. Interpretation of the results of laboratory and instrumental research methods (it is desirable to have X-rays, the results of ultrasound diagnostics, CTG research in electronic form, etc.);
- e. Mastering of emergency care in emergencies.

The grade from the section of practical training is set according to the Regulations on the organization and conduct of students' practice of DNMU (Lyman, 2021). The result is provided to the profile dean's office and the responsible person for practical training in of DNMU Assoc. Husev V.M.
